SUMMARY

Highly skilled Full Stack Developer with extensive experience designing, developing, and maintaining robust web applications. Proficient in front-end technologies like JavaScript, TailwindCSS, React.js, Astro.js, and back-end technologies including PHP and Laravel. Thrives on transforming complex ideas into intuitive and visually stunning websites that users love interacting with. Expertise in integrating and optimizing custom in-house frameworks to meet specific client needs. Strong problem-solving abilities with a keen eye for detail, consistently delivering high-quality solutions.

WORK EXPERIENCE

Mid Full Stack Developer, Oxopia NV **Aug 2020- July 2024**

Technologies:

- PHP, Laravel, Livewire, Twig PHP, Craft CMS, TailwindCSS, Bootstrap, CSS3, React.js, Javascript, Vue.js, JQuery, Alpine JS, and MySQL.

Projects Developed:

- **The Banking Scene (thebankingscene.com)**
 - The Banking Scene is a platform for banking professionals. It connects organizations and individuals to help shape the future of the banking industry through various events, insights, and networking opportunities. The platform hosts conferences, meetups, and provides resources that enable banking professionals to stay informed and connected with the latest trends and developments in the industry.
 - The technologies that were used on this are Twig PHP, Craft CMS, TailwindCSS and integrating services such as Eventbrite, Hubspot, Brella.io.
- **Van Roey (vanroey.com)**
 - Van Roey is a company website that is about one of the largest shrimp distributors in Belgium.
 - The technologies that were used on this are Twig PHP, Craft CMS, Javascript and CSS3.
- **Struso (struso.com)**
 - Struso is a management software that boosts productivity and efficiency in team-oriented businesses such as to-dos, project management, etc.
 - The technologies that were used on this are Vue.js, Bootstrap, JQuery, and CSS3.
- **Formlets (formlets.com)**
 - Formlets is a form builder site that lets you create, edit, and manage your form. Features exist such as knowing how many responded to your form, creating and editing an auto-response to your forms, inventory, and data source manager, etc.
 - The technologies that were used on this are Custom PHP Framework, JQuery, Bootstrap and CSS3.
- **Remotists.com (remotists.com)**
 - Remotists is a newsletter site that curates more than a hundred jobs a week. Basically, it's a list of handpicked jobs from some of the best companies in the world sent to your email if you subscribed to the site.
 - The technologies that were used on this are Custom PHP Framework, JQuery, Bootstrap and CSS3.
- **Track Your Ticket (trackyourticket.com)**
 - A ticketing tool used for support teams to make resolving issues organized and efficient. It was developed using Laravel, Filament PHP, Livewire, Tailwind and AlpineJS.

- **Unpublished Projects**

- During my work in Oxopia, we did many unpublished projects that used technologies such as React.js, Astro.js, and Typescript. For example, we made a mobile community app by using Ionic React for the frontend while using Laravel for its backend.

Junior Developer, Benpos Systems

June 2019- March 2020

Technologies:

- C#, ES6, .NET framework and WordPress

About:

- Benpos Systems is a local software development company that focuses on the development of windows application for businesses/organizations using C# and .Net framework. Examples of this are Point of Sales Systems, Inventory Systems, Accounting Systems, and customized systems.
